

## **SURFAPORE M APPLICATION ON ITALIAN MARBLE AT PERUNGUDI**

**At Perungudi when Italian marble was laid, Surfapore T was applied at the bottom for protection from efflorescence. Then Surfapore M was applied on the top after all polish was completed for protection from oil and water stains.**

## **Surfapaint Stone Varnish (water based) coating for marble stones on the exterior façade**

**A façade of a building at T Nagar had natural marble stones. They were cleaned and then coated with Surfapaint Stone Varnish (water based) for protecting the marbles from water, oil, grease, pan masala etc. They also give a wet look/glossy look to the marble stones and enhances the look.**

## **SANDSTONE FAÇADE PROTECTION BY USING STONE VARNISH (WATER BASED)**

**Sandstone is a very porous material and it absorbs water, stains easily and algae/moss formation is also very quick. About 3000 sft of Sandstone façade of a building at Uthandi was protected by using Surfapaint Stone Varnish which is water based and green product. Stone varnish protects from pan masala, oil, grease, water, red mud stains etc**

# **APPLICATION OF SURFAPAIN STONE VARNISH ON FLAMMED GRANITE STONES AT RUBY BUILDERS- Ar.W.ANAND**

**All the flamed granite stones (after complete cleaning) were coated with Surfapaint stone varnish for complete stain protection from water, oil, pan masala, red mud etc**

## **Protection of natural stones, water proofing at Intercontinental Resorts & Hotel, Chennai**

**The swimming pool wall claddings were of natural stones and had lots of efflorescence which was cleaned using water, Desalin C and then nano protection coating of Surfapore C was done.**

**The banquet hall, office corridor, Presidential suite corridor natural stone floorings were protected using Surfapore M which is oil and water repellent. In Presidential suite corridor which is in open the joints which were small and hence pointing can not be done, cement mixed with Surfamix C and Surfapore were injected into the joints and Stone varnish (water based) was applied in the joints and whole floor surface protected by Surfapore M.**

## Italian marble/Onyx/Natural stone protection at Sumanth & Co flat

**Italian marble flooring, Onyx puja steps were cleaned and protected with Surfapore M for water and oil repelling coating. The balcony floors were of rough natural stones and they were protected by using Surfapaint stone varnish (water based) form stains, oils etc.**
